

TEE and Ultrasound Probe Repair

We provide Quality Surgical Device Repair

At Optimum Surgical, it is our mission to partner with healthcare facilities to better maintain surgical devices in a cost effective manner. We are dedicated to providing reliable, quality repair services that significantly reduce costs and increase clinical efficiency while providing unparalleled service. Using only quality replacement components, we ensure that all devices perform as intended giving you the peace of mind you deserve.

Optimum Surgical's ultrasound probe repair capabilities span across all models on the market including Matrix, TEE, 2D, and 3D/4D ultrasound probes. Quality is our commitment. To ensure repairs meet or exceed industry and OEM specifications, all items we work on receive multiple quality assurance and performance tests. Whether it's a simple lens repair or an extensive overhaul on a TEE probe, the repair specialists at Optimum Surgical provide you with quality ultrasound probe repair solutions. All ultrasound probe repair services and parts are ISO certified to ensure quality and consistency.

Free Estimates. Free estimates available for all ultrasound probe repairs.

Free Loaners. We offer an extensive stock of ultrasound probe loaners that can be shipped same day, while your probe is being evaluated.

Exchange Programs. Replacement probes available at competitive exchange prices.

Quick Turnaround. Most ultrasound probe repairs are completed within 3 to 5 days.

Satisfaction Guaranteed. We offer a 100% satisfaction guarantee for all ultrasound probe repairs. If you are not completely satisfied with the quality and/or workmanship of your ultrasound probe repair(s), Optimum Surgical will fix or replace the item(s) free of charge.

Cost Savings. Customers who utilize Optimum Surgical for ultrasound probe repair realize savings between 20% and 50% over the original equipment manufacturers.

Preventative Maintenance and Education. Optimum Surgical offers preventative maintenance and education programs to help reduce the frequency and severity of ultrasound probe repairs.
